MetaFind, A Powerful Online Search Tool (30/03/2005)

Library users sometimes may find it cumbersome to search electronic database one by one via the Library homepage. In order to help solve this problem, the Library is pleased to launch a powerful one-stop search tool (MetaFind) that can be used to search a number of databases plus library catalogues simultaneously.

MetaFind is now available for your use at http://umaclib3.umac.mo/screens/metafind_note.html. Alternatively, you may use other links provided in our homepage for access (please open the attached PowerPoint file for details). Since web access to those subscribed journals/databases with MetaFind is restricted only to our staff and students via UM campus network, user name, ID and password have to be entered when accessing through MetaFind. Again, kindly find the attached PowerPoint file as a simple guideline for your reference.
