

Special Arrangements in the Library (03/07/2008)

Dear all,

Starting from July, the University Library will take part in the “Public Departments/Organizations Energy Beneficial and Energy Saving Project” organized by Gabinete para o Desenvolvimento do Sector Energetico (GDSE). In order to save energy, the Library has adjusted the air-conditioning system to a slightly higher temperature and switched off parts of the lights in corridors and washrooms.

Furthermore, during the University recess, the book-shelves on the 1/F of the Library will be relocated and rearranged. This project might create some noise and book locations will be changed which might lead to book searching inconvenience. However, if you have encountered any problem, please feel free to seek help at our circulation counter located at the Library lobby.

Sorry for any inconvenience caused!

Thank you for your kind attention.

Regards,
UM Library
