

"Library Information System" on University Information Kiosks (06/12/2006)

Dear all,

We are pleased to announce that the Library has produced a "Library Information System" as a module on the University Information Kiosks as a convenient guide to the Library's resources and services. Please find the opening page of this system at the end of this announcement.

This system, in both Chinese and English, includes introduction to Library's facilities, collections, services and latest news issued by the Library. The touch-screen Kiosks are located in the Library lobby, the Administrative Building, ICTO's computer rooms and Sports Complex.

It is hoped that this system, aided with attractive graphics, will make your use of the Library easier and more convenient. All are welcome to try it out.

With regards,
UM Library
