

## A New Library Service: BrowZine -- An Easy and Flexible Way to Browse Journals (14/03/2014)

Dear All,

We are pleased to launch a new library service -- [BrowZine](#), which is an app that offers you an easy and flexible way to browse your favorite journals on your tablet devices.

BrowZine™ is an app that organizes the academic journals found in Open Access and our Library subscription databases, unites them into an easily browsable format, and delivers to your iPad or Android tablet. In addition, it also offers some of the benefits as follows:

- You may browse about 10,000 UM subscribed scholarly journals published by **supported publishers**, by subjects or by A-Z titles.
- You may add your favorite journals or articles to "My Bookshelf" for future easy access.
- You may export the articles to Refwork, Endnote and share them via email, or various social media like Facebook, Mendeley and so on.

To set up and use it in your iPad or Android tablet, please see the ppt file below for BrowZine User Guide.
